

TRACK SCREW LTD

the innovative, concrete-free steel foundation system

up to

95%

less time
less risk
less labour costs

A single Track Screw can replace one cubic metre of concrete

✓ Faster and Safer

A single Track Screw can be installed in 10 minutes or less by only two workers. With no excavation, no spoil, no wet trades, and no curing time, it can be loaded immediately. Spending less time on site means it's safer, with less risk and less labour costs.

✓ Efficient

Equipment and materials are lightweight - under 25kg. The installation tool is battery powered, so it's easier to handle, and a single battery charge lasts for multiple installations.

✓ Environmentally Sound

Track Screw installation is quieter, with less disruption - no generator, no fumes, no fuel, no vibration. In total, a Track Screw installation produces 85% less CO2 compared to concrete.

✓ Fit for Purpose

Track Screws are suitable for all ground conditions, with up to 70 years lifespan. They are ideal for trackside signalling and cabling assets, signage, LOC stagings, and more. All Track Screws hold a 25 year warranty.

Track Screw Ltd can **supply the Track Screw anchors** and our **unique handheld installation equipment - to buy or hire**. We also offer **full training courses** for installers and a technical team to provide design advice and ongoing support.
